

SYIFY BSC

About

SYIFY is an next gen defi project providing solutions including streaming services, data center services, cloud & managed services, transformation integration services and Blockchain integration services.

**SYIFY project played an important role in blockchain Technology.
It will be listed on different exchanges as it grows.**

SYIFY BSC

How it Works

SYIFY dApp design layout is already built for streaming overlay purposes.
Contract will be released in a few days

SYIFY is building the next-gen defi technology that will connect game streamers and advertisers into one defi platform.

SYIFY has created the first and only streaming overlay dapp that will track streaming performance, analytics and reward game streamers in real-time.

Mission Vision

Syify bsc envisions the accomplishment of easy earnings and good returns through the distribution of transaction fees to the token holders. Unlike the traditional DeFi platforms you do not have to stake or farm your tokens for rewards. All you have to do is just hold the Syify bsc tokens in your wallets.

Tokenomics

Token name	Total supply	Token symbol
SYIFY BSC	5,000,000,000	SFY

Smart contracts

Contract not yet out will be released in a few days

This project will be launched on the Binance Smart Chain

THANK YOU.
